COVID Update

Giving Thanks

As we approach Thanksgiving Day, we have much to be thankful for. First, and certainly not the least of which is we are COVID free and influenza free throughout the Schmitt Woodland hills campus. Hospital grade masks for all staff and visitors are being required but no other protocols are in place at this time.

Visitors are not required to take their temperatures or to answer the screening questions. The only requirement is to wear a mask. If you don't have one with you there will be a supply at each of the entrances.

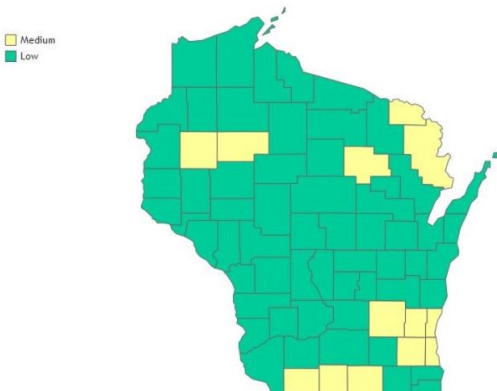

Additional testing will only be required in cases where symptoms are present. This is truly a wonderful Thanksgiving gift.

*COVID FREE
EVERYWHERE
ACROSS SWH*

COVID Community Level Data

On Friday November 18, 2022 the State Community Levels map showed some significant change compared to the map from two weeks ago. As of last Friday no counties were showing High levels of activity. That's been a long time coming! 13 counties were showing Medium levels, down from 19 two weeks ago. 59 counties are now showing Low levels of COVID, up from 52 two weeks ago. This is a very positive trend and can all pray it keeps heading in the right direction.
